EXECUTIVE SUMMARY

Bright Coffee generated \$698.8K across 149,116 transactions between 2023-01-01 and 2023-06-30, moving 214,470 product units at an average ticket of \$4.69. Sustainably Grown Organic Lg leads on revenue while Earl Grey Rg tops on volume. The Hell's Kitchen store outperforms the network with \$236.5K in sales.

Trade peaks around 10:00, confirming a strong morning-commuter pattern, while Mon is the best-performing weekday overall. The biggest opportunities: bundle top-volume drinks with bakery to lift AOV, run targeted promotions during off-peak afternoons, and align staffing with the hourly demand curve to protect margin during the morning rush.

INSIGHTS AND RECOMMENDATIONS

Increase inventory for top-selling products to prevent stockouts.

Promote high-margin beverages at checkout.

Run promotions during low-sales hours to smooth demand.

Launch weekday loyalty campaigns.

Prioritize stock allocation to top-performing stores.

Promote slow-moving products with limited-time offers.

Launch seasonal beverages during peak demand months.

Recommend products from historical purchase patterns.

Investigate underperforming stores for menu-fit issues.
